FILED UNDER SEAL**1 NOTICE OF MOTION AND MOTION FOR CLASS CERTIFICATION**

2 PLEASE TAKE NOTICE that on December 14, 2023, at 10:00 a.m., before the Honorable
3 James Donato, of the United States District Court for the Northern District of California, San
4 Francisco Division, 450 Golden Gate Avenue, San Francisco, California, Courtroom 11, 19th Floor,
5 Advertiser Plaintiffs Affilius, Inc., Jessyca Frederick, Mark Berney, 406 Property Services, PLLC,
6 Mark Young, and Katherine Looper, on behalf of themselves and all others similarly situated, will
7 and now do move the Court for an order granting Advertiser Plaintiffs' Motion for Class Certification
8 pursuant to Federal Rule of Civil Procedure 23.

9 Advertiser Plaintiffs seek entry of an order (1) certifying a proposed Rule 23(b)(3) class;
10 (2) appointing Advertiser Plaintiffs Affilius, Inc., Jessyca Frederick, Mark Berney, 406 Property
11 Services, PLLC, Mark Young, and Katherine Looper as representatives of the Class; and
12 (3) appointing Yavar Bathaee of Bathaee Dunne LLP and Amanda F. Lawrence of Scott+Scott
13 Attorneys at Law LLP as Co-Lead Class Counsel for the Class. Advertiser Plaintiffs propose that the
14 Class for their Sherman Act claims be defined as follows:

15 THE ADVERTISER CLASS

16 All persons, including entities and/or corporations, in the United States
17 who purchased advertising from Meta Platforms, Inc. (f/k/a Facebook,
18 Inc.) between December 1, 2016, and December 31, 2020 (the "Class
19 Period").

20 Excluded from the Advertiser Class are Meta Platforms, Inc. (f/k/a Facebook, Inc.) ("Meta")
21 and its officers, directors, employees, and successors; any person or entity who has (or had during the
22 Class Period) a controlling interest in Meta; any affiliate, legal representative, heir, or assign of Meta;
23 any judicial officer presiding over this action and their immediate family members and judicial staffs;
24 and any juror assigned to this action.

25 This motion is based upon this Notice of Motion, the accompanying Memorandum of Points
26 and Authorities, all filed supporting declarations and exhibits, the expert reports and reply expert
27 reports of Dr. Michael Williams, Prof. Joshua Gans, Kevin Kreitzman, and Scott Fasser, the records
28 from this action, and any argument that may be presented at or before the hearing on this Motion.

FILED UNDER SEAL

MEMORANDUM OF POINTS AND AUTHORITIES

In 2016, Meta Platforms, Inc. (“Meta”), then called Facebook, faced an existential threat to its dominance over a unique type of advertising – social advertising. Facebook had recently scuttled its developer platform to eliminate competition from third-party applications, but was left vulnerable by the resulting paucity of “signals” it used to target advertising and content to its users. At the same time, a technological sea change was occurring in how advertising could be targeted. A new form of artificial intelligence was rising – based not on hardcoded instructions by computer programs, but on deep layers of neural networks, which could make decisions based directly on observed data. This exacerbated Facebook’s dilemma from its recent destruction of thousands of third-party apps running on its social network, which might have otherwise provided Facebook the engagement and user data it needed to transition to cutting-edge targeting technologies. For the first time, the powerful barrier to entry that protected Facebook’s business, the Data Targeting Barrier to Entry (the “DTBE”), was threatened, leaving Facebook’s social advertising monopoly potentially vulnerable to competition from new entrants. And indeed, a new entrant had arrived – an app called Snapchat, which was rapidly overtaking Facebook’s popularity among younger users.

16 By late 2016, Facebook was in bet-the-company mode to protect its powerful market position
17 – a position that had afforded it substantial, and growing, pricing power over social advertisers. Under
18 the direct supervision of its founder Mark Zuckerberg, the company began an aggressive campaign
19 to maintain and strengthen its monopoly. From 2016 through 2020, Facebook wiretapped its
20 competitors, [REDACTED] to neutralize competition; it bought off would-be competitors like
21 [REDACTED] with competition-restricting API deals; cut a deal with Netflix (whose
22 CEO sat on Facebook’s board) to cripple Facebook’s premium video product; and agreed to a brazen
23 market division with Google. All the while, Facebook raced to integrate [REDACTED]
24 [REDACTED] and when the FTC
25 investigated Facebook’s integration, the company misled it to avoid divestiture. This multi-pronged
26 campaign worked. Facebook was able to back off the financial precipice it was on the edge of in late
27 2016, successfully extending its social advertising monopoly into the next decade, allowing it to

FILED UNDER SEAL

1 repeatedly and substantially raise social advertising prices into 2020 without losing market share –
2 all while product quality stagnated, [REDACTED]

3 The named Advertiser Plaintiffs – proposed as Class representatives here – are people and
4 companies that bought social advertising at prices inflated by Meta’s unlawfully maintained
5 monopoly. Advertiser Plaintiffs seek to certify a single class of Meta advertising purchasers from
6 December 1, 2016, to December 31, 2020. As explained below, their claims are precisely the sort
7 suitable for classwide treatment. Every element required for a Rule 23(b)(3) class is met here.

8 *First*, there is no question that Advertiser Plaintiffs’ claims present issues common to all Class
9 members, including as to Meta’s liability under the antitrust laws. Questions such as market
10 definition, market power, and exclusionary conduct will be proven exclusively through common
11 evidence from Meta and third parties. These questions are about *Meta*’s conduct and are not answered
12 differently for any of the Advertiser Plaintiffs or Class members. Moreover, injury and damages
13 issues also present common questions under the methodology proposed by Advertiser Plaintiffs’
14 experts. Meta’s exclusionary conduct maintained its monopoly – unlawfully – during the entire Class
15 Period and wreaked a consistent overcharge on each member of the proposed Class.

16 *Second*, these common questions plainly predominate the issues to be tried. In antitrust cases,
17 liability issues are a canonically predominant common question. *See Amchem Prods., Inc. v. Windsor*,
18 521 U.S. 591, 625 (1997). As to damages, the methodology proposed by Advertiser Plaintiffs’ expert,
19 Dr. Michael Williams, arrives at readily calculable overcharge damages for every member of the
20 Class based on a well-established yardstick damages methodology. Facebook’s purported expert,
21 Dr. Catherine Tucker, presents several predominance arguments, but none of them are availing.
22 Dr. Tucker, for example, argues that Dr. Williams’ damages methodology fails to consider the
23 benefits to each individual Class member arising from Facebook’s anticompetitive conduct, but as
24 Dr. Tucker herself explains, she does not provide evidence of such benefits – unsurprising, given that
25 Dr. Williams found no improvement to Facebook’s social advertising products, [REDACTED]

26 [REDACTED] during the Class Period. Dr. Tucker also makes
27 arguments about the effects from particular Meta actions, but *not* from the monopoly those actions
28 unlawfully maintained – an economically unsound analysis, given that (as two different experts

FILED UNDER SEAL

1 explain) it was Meta’s unlawful monopoly that caused the overcharge injury to Advertiser Plaintiffs
2 and the proposed Class. Dr. Tucker also falls back to the unfounded refrain that various ads are priced
3 differently, but neglects the documented workings of Meta’s advertising auctions in doing so. Not
4 one of Dr. Tucker’s criticisms show that common issues would not predominate a trial in this action
5 – not even close. Should Meta rely on those criticisms, they cannot defeat class certification here.

6 *Finally*, the elements of typicality and adequacy are met. Advertiser Plaintiffs purchased ads
7 during the Class Period and are typical of the antitrust claims to be asserted by every member of the
8 Class, particularly given Facebook’s conduct in this litigation waiving any post-May 2018 arbitration.
9 As to adequacy, the named Advertiser Plaintiffs have invested significant time and effort in this case,
10 including being deposed and making extensive document productions. Advertiser Plaintiffs’ counsel
11 have also vigorously litigated the case, including by taking depositions, litigating discovery issues,
12 and overcoming two motions to dismiss by Meta. Put simply, every element for class certification is
13 met here – based on extensive evidence. The Court should certify the proposed Advertiser Class, and
14 this case should be tried on a classwide basis.

15 STATEMENT OF COMMON FACTS¹**16 I. THE PROPOSED CLASS**

17 Advertiser Plaintiffs propose a single class for certification, consisting of everyone who
18 bought advertising from Meta between December 1, 2016, and December 31, 2020. While this differs
19 in two respects from the classes proposed in the AFAC, those differences are logical and merited in
20 light of case developments since the filing of the AFAC.² *First*, the class period is narrower in this
21 motion (here, it ends on December 31, 2020) than in the AFAC (there, it continued to “the present”),
22 reflecting the time period of Meta’s exclusionary conduct and classwide overcharge identified in fact
23 and expert discovery. *Second*, the AFAC proposed two classes split in time based on an arbitration
24 clause introduced into Meta’s Commercial Terms on April 4, 2018. However, Meta’s actions in this
25

26 ¹ The Statement of Common Facts is cited herein as “SOCF.”

27 ² Advertiser Plaintiffs’ First Amended Complaint (“AFAC”) defines two classes: (i) all people
28 who bought advertising from Meta between December 1, 2016, and April 3, 2018, but not after April
3, 2018; and (ii) all people who bought advertising from Meta between April 4, 2018, and the present.
ECF No. 237 (AFAC), ¶¶839, 842.

FILED UNDER SEAL

1 litigation – including vigorously litigating, on the merits, market definition, monopoly power,
 2 damages, and anticompetitive conduct issues extending from 2016 through late 2020 – have
 3 unambiguously waived any right to arbitrate the claims of proposed Class members.³

4 Advertiser Plaintiffs’ proposed class definition is thus narrower than that proposed in the
 5 AFAC, and the changes are minor and non-prejudicial to Meta. The Court can and should consider
 6 the class as proposed in this motion.⁴ However, if the Court declines to adopt Advertiser Plaintiffs’
 7 proposed updated class definition, or if Meta argues that it has not waived arbitration and the Court
 8 agrees, the Rule 23 arguments set forth here, and the analysis conducted by Advertiser Plaintiffs’
 9 class certification experts, would support certifying two classes, one for advertisements purchased
 10 prior to May 25, 2018, and a second for advertisements purchased on or after May 25, 2018. *See*
 11 *Cancino Castellar*, 2021 WL 4081559, at *10 (exercising Court’s “broad authority to redefine classes
 12 as appropriate” to analyze class different from that brought in certification motion); Williams Rpt.,
 13 ¶6 (analysis applies to split classes from AFAC).⁵

14 **II. COMMON CLASSWIDE EVIDENCE OF THE RELEVANT MARKET**

15 The relevant antitrust market in this action – the United States Social Advertising Market –
 16 will be defined through common, classwide evidence. As explained by Dr. Michael Williams in his
 17 expert report, social advertising is advertising that can be targeted based on social data contained in
 18 a “social graph.” Williams Rpt., ¶¶10, 16-29. Similarly, Prof. Joshua Gans reinforces in his expert
 19 report that social advertising is advertising that uses data “to predict the purchase intents of particular
 20 users” that is obtained primarily from “a user’s social graph.” Gans Rpt., ¶¶23-24. The effectiveness

21 ³ *See Hill v. Xerox Bus. Servs., LLC*, 59 F.4th 457, 469-70 & n.15 (9th Cir. 2023); *DZ Rsrv. v.*
 22 *Meta Platforms, Inc.*, No. 3:18-cv-04978-JD, 2022 WL 912890, at *4 (N.D. Cal. Mar. 29, 2022)
 (Donato, J.); *Roman v. Jan-Pro Franchising Int’l, Inc.*, 342 F.R.D. 274, 290-94 (N.D. Cal. 2022).

23 ⁴ *See Cancino Castellar v. Mayorkas*, No. 17-cv-00491, 2021 WL 4081559, at *8 (S.D. Cal.
 24 Sept. 8, 2021) (“The definition of the class at the class certification stage may diverge from that set
 25 forth in the Complaint, as long as the new class definition is narrower than the original . . . or the
 26 proposed change is minor and non-prejudicial to the defendant.”); *In re TFT-LCD (Flat Panel)*
Antitrust Litig., 267 F.R.D. 583, 590-91 (N.D. Cal. 2010) (modified class definitions permitted where
 they were “minor, required no additional discovery, and caused no prejudice to defendants”). Unless
 otherwise noted, emphasis is added and citations are omitted throughout.

27 ⁵ The expert reports and reply expert reports of Advertiser Plaintiffs’ experts Dr. Michael
 28 Williams, Prof. Joshua Gans, Kevin Kreitzman, and Scott Fasser are submitted as exhibits to each
 expert’s declaration filed herewith. For example, the Williams Report (“Rpt.”) and Williams Reply
 Report (“Reply”) are Exhibits A and B to the Williams Declaration.

FILED UNDER SEAL

1 of social advertising depends on both the quality and quantity of social data used to train the offeror’s
2 artificial intelligence/machine learning (“AI/ML”) models and the possession of better AI/ML
3 modeling systems, and a nascent Social Advertising Market competitor must reach a critical mass of
4 both social data and AI/ML to meaningfully challenge incumbent firms. Williams Rpt., ¶¶22-29.
5 Facebook and Instagram sold social advertising during the Class Period, as did Twitter, LinkedIn,
6 and Snap, among others. *Id.*, ¶¶30-68. All of Meta’s ad products sold during the Class Period across
7 Facebook and Instagram were social advertising products. Williams Reply, ¶¶46-52. Meta had a
8 dominant position in the United States Social Advertising Market throughout the Class Period,
9 including the ability to raise prices to supracompetitive levels – which it did. Williams Rpt., ¶¶216-
10 322. At trial, Advertiser Plaintiffs will prove that the United States Social Advertising Market is a
11 relevant antitrust market through common, classwide evidence (*id.*, ¶¶127-143), including through
12 *Brown Shoe* evidence drawn from common sources and well-established economic theories, including
13 Meta’s own documents and testimony; the documents and testimony of relevant third parties
14 including advertising purchasers and sellers, regulators, and industry analysts; and Dr. Williams’
15 classwide economic analysis, including a SSNIP test. *Id.*, ¶¶144-215.

III. COMMON CLASSWIDE EVIDENCE OF META’S UNLAWFUL CONDUCT

17 Trial in this case will focus principally on common, classwide evidence of Meta’s
18 anticompetitive conduct. Specifically, Advertiser Plaintiffs will prove that Meta maintained its
19 monopoly between December 2016 and December 2020 through an anticompetitive course of conduct
20 comprising five principal categories of exclusionary acts: (1) Meta’s use of Onavo technology,
21 including Meta’s [REDACTED] to monitor and preempt competitive threats,
22 including from Facebook’s horizontal Social Advertising competitor Snapchat; (2) Meta’s
23 agreements with hand-picked potential entrants, including [REDACTED]
24 [REDACTED] for access to private
25 Application Programming Interfaces (“APIs”), which provided these third parties with private Meta
26 user data [REDACTED] (3)
27 Meta’s agreement with Netflix to obtain large advertising expenditures from Netflix that inflated the
28 demand for (and price of) Facebook’s social advertising and ensured that the signals generated from

FILED UNDER SEAL

1 Netflix ads would go to Meta and not an actual or potential social advertising rival, in exchange for
2 Meta's agreement to scuttle certain aspects of its Facebook Watch product, which threatened
3 competition against Netflix in its core video streaming market; (4) Meta's agreement with Google to
4 stave off potential competition from Google's open web display advertising product in return for
5 Meta's abandonment of entry into Google's core market and for billions of dollars in guaranteed
6 advertising spending on Google's advertising exchange; and (5) Meta's deception of the U.S. Federal
7 Trade Commission ("FTC") to forestall divestiture or regulatory scrutiny as Meta integrated signals
8 from across its business through a one-stop "buffet" for AI/ML training. These exclusionary acts will
9 be the unambiguous centerpiece of a trial, and, as shown below, each category will be proved through
10 common, classwide evidence – principally evidence from Meta's own documents and witnesses.

11 *First*, during the Class Period, Meta used Onavo technology to wiretap its competitors,
12 including [REDACTED] In this program,
13 Meta paid people (some of whom were teenagers) to [REDACTED]

14 [REDACTED]

12 [REDACTED] This included by, [REDACTED]
13 [REDACTED]
14 [REDACTED] Ex. 11 at 50:12-22.

15 *Second*, during and leading up to the Class Period, Meta secretly entered into private extended
16 API agreements with selected companies with large user bases and data troves that made those
17 companies particularly well-suited to build or equip a potential Social Advertising rival. For example,
18 Meta entered into such agreements with [REDACTED] – companies that
19 threatened Meta’s DTBE through social elements of their products (*e.g.*, [REDACTED]

20 [REDACTED] that could potentially be leveraged to create a
21 rival Social Advertising platform or product. These private extended API agreements included
22 [REDACTED] which helped prevent or restrict
23 entry into the Social Advertising Market by Meta’s private API counterparties. The restrictions were
24 in force, and counterparties like [REDACTED]
25 [REDACTED]

26 All the foregoing will be shown through common, classwide evidence. For example:

1 aftereffects of the companies' market division. Thus, for example, [REDACTED]
2 [REDACTED]
3 [REDACTED]
4 [REDACTED]
5 [REDACTED] See, e.g.,
6 Ex. 43.

7 When header-bidding technology threatened Google's open-web display advertising business
8 model and Meta publicly threatened to adopt it in 2017 in connection with its display network, FAN,
9 each company posed an imminent competitive threat to an online advertising submarket previously
10 dominated by the other. *Id.*, Ex. 44, Ex. 45, Ex. 46, Ex. 47, Ex. 48 at 237:10-238:14, Ex. 49 at 156:11-
11 157:1, 169:12-15, 209:25-210:12. In response to the threat from header bidding, Google developed
12 a new open-web display product, Exchange Bidding Dynamic Allocation ("EBDA" or "Open
13 Bidding"), [REDACTED] Ex. 50; *see also* Ex. 51, Ex.
14 52, Ex. 53, Ex. 49 at 223:4-224:24, 228:5-11, 230:1-8.

15 This mutual competitive pressure was deflated by the companies agreeing to divide markets,
16 [REDACTED] Ex.
17 54, Ex. 55, Ex. 56, Ex. 57, Ex. 58, Ex. 59. [REDACTED]
18 [REDACTED]
19 [REDACTED]
20 [REDACTED] Ex. 41 at 359-60, Ex. 60, Ex. 61, Ex. 62, Ex.
21 48 at 219-28, Ex. 63 at 148:3-15. [REDACTED]
22 [REDACTED] (Ex. 41 at 361-66), [REDACTED]
23 [REDACTED] Ex. 64 at 415, Ex. 65, Ex. 66 at 188, 199, 201, 207, Ex. 63 at 205:22-207:19. All of
24 this evidence at trial will be common and classwide, principally from the documents and testimony
25 of Meta and Google themselves.

26 *Fifth*, Meta deceived the FTC and the public during the Class Period regarding the viability
27 of divestiture and segregation of Meta's business units and data from its Facebook Blue, Instagram,
28 WhatsApp, and Messenger lines of business, while at the same time racing to implement a

FILED UNDER SEAL

1 [REDACTED]
2 [REDACTED] This conduct, which prevented any divestiture (or segregation-related competitive price
3 check) from occurring during the Class Period [REDACTED]
4 [REDACTED]

5 [REDACTED] will be proven entirely through common, classwide evidence. For example, common
6 evidence will show that [REDACTED]
7 [REDACTED]
8 [REDACTED]

9 [REDACTED] See, e.g., Ex.
10 67, Ex. 68. [REDACTED]

13 151:10-13; Ex. 71 at 2-5 [REDACTED]
14 [REDACTED]
15 [REDACTED] Ex.

16 69 at 779. These omissions to the FTC are not only based on common evidence; they are undisputed.

17 **IV. COMMON EVIDENCE OF CLASSWIDE ANTITRUST IMPACT**

18 Advertiser Plaintiffs rely on widely accepted economic models and other common, classwide
19 economic evidence in evaluating the effects of Meta's conduct on advertisers. For example, Dr.
20 Michael Williams' analysis shows that but for Meta's unlawfully maintained monopoly, Advertiser
21 Plaintiffs and the proposed Class would have paid lower prices and benefited from improvements to
22 quality, choice, and output in purchasing social advertisements during the Class Period.

23 **A. Common Evidence Shows that Meta Had Monopoly Power in the Social 24 Advertising Market**

25 Advertiser Plaintiffs will prove through common, classwide evidence that Meta had monopoly
26 power – that is, the ability to enhance its profits by raising prices substantially above marginal costs
27 for a substantial volume of sales – in the United States Social Advertising Market during the Class
28

FILED UNDER SEAL

1 Period. *See* Williams Rpt., ¶¶216-322. This will be shown through both direct and indirect evidence,
2 on a common, classwide basis, as Dr. Williams explains in his expert report.

3 As direct evidence of Meta's monopoly power in the U.S. Social Advertising Market, Dr.
4 Williams used Meta's economic profit rate ("EPR"), return on capital employed ("ROCE"), and
5 operating margin (calculated by Advertiser Plaintiffs' expert Kevin Kreitzman and the UK's principal
6 antitrust regulator, CMA) to conclude that Meta had monopoly power during the Class Period. *See*
7 Williams Rpt. at 97-98 [REDACTED]

8 [REDACTED] *id.* at 99 [REDACTED]

9 [REDACTED] *id.* at 99-100 [REDACTED]

10 [REDACTED]
11 [REDACTED] These direct measures of market power indicate, through widely accepted economic methods
12 using common evidence, that Meta was able to enhance its profits by raising prices substantially
13 above marginal costs for a large volume of sales over a sustained period of time. *Id.* Additionally,
14 Meta's own documents produced in this case are common evidence that Meta had pricing power,
15 which it exercised by consistently raising prices during the Class Period without sacrificing market
16 share. *Id.* at 100-01. Further, competition authorities, industry analysts, and market participants have
17 concluded that Meta had monopoly power in the Social Advertising Market during the Class Period
18 (*id.* at 101-13), and Meta- and third-party-produced documents and testimony show that Meta could
19 and did exclude competition from the Social Advertising Market both leading up to and during the
20 Class Period. *Id.* at 113-28. All of the above is common evidence, based on widely accepted
21 economic methodology, which will be used to show on a classwide basis that Meta had monopoly
22 power in the Social Advertising Market during the Class Period.

23 Advertiser Plaintiffs will also show through indirect evidence that Meta had monopoly power
24 in the U.S. Social Advertising Market during the Class Period. *See* Williams Rpt., ¶¶285-322. Meta's
25 market share in the U.S. Social Advertising Market increased from 18.4% in 2008 to 82.7% in 2020,
26 and ranged from 82.7% to 84.0% during the Class Period. *Id.*, ¶¶285-290; *see also id.*, ¶¶291-295
27 [REDACTED] Common

28 evidence, including reports and analyses by competition authorities and academic experts (*id.*, ¶¶296-

FILED UNDER SEAL

1 311), and Meta’s own documents (*id.*, ¶¶312-322), will show that there are substantial barriers to
2 entry into the Social Advertising Market – further indirect evidence of Meta’s monopoly power given
3 its dominant market position.

4 **B. Common Evidence Shows that All or Virtually All Class Members Were
5 Injured by Meta’s Conduct**

6 Dr. Williams uses well-accepted economic methods and common evidence to show that all,
7 or virtually all, members of the proposed Class were injured due to a classwide price inflation in
8 Meta’s social advertising prices during the Class Period. Williams Rpt., ¶¶324-354. For example,
9 Dr. Williams analyzes the social advertising prices that would have existed in a but-for world in the
10 absence of the alleged conduct that maintained Meta’s monopoly during the Class Period, employing
11 a damages methodology that uses firms’ EPRs based on a “yardstick” model. *Id.*, ¶¶324-326. These
12 are well-accepted economic methods for evaluating anticompetitive price inflation. *Id.* In
13 collaboration with Mr. Kreitzman, Dr. Williams analyzes classwide economic injury by estimating
14 Meta’s but-for advertising revenues based on the EPRs of comparable companies (*id.*, ¶¶327-350),
15 and concludes that but for Meta’s monopoly-preserving anticompetitive conduct, Meta’s advertising
16 revenues would have been [REDACTED] during the Class Period. *Id.*, ¶¶351-354. Put another way,
17 its actual advertising revenues were [REDACTED] than they would have been in the but-for world,
18 meaning advertisers were overcharged by [REDACTED] as a percentage of but-for values. *Id.*

19 Dr. Williams also draws on the evidentiary record and the advertising industry expertise of
20 Scott Fasser to conclude that Meta did not routinely offer discounts to individual advertisers, and that
21 even advertisers who received discounts would have been injured as against the but-for world given
22 the price inflation due to Meta’s monopoly-maintaining anticompetitive conduct. *Id.*, Williams
23 Reply, ¶¶95-96; *see also* Ex. 72 at 13:23-16:24, 26:2-27:4 [REDACTED]
24 [REDACTED]
25 Ex. 73 at 274:25-275:3 [REDACTED]

26 [REDACTED] Ex. 74 at 42:4-15, 45:25-46:5 [REDACTED]
27 [REDACTED]

FILED UNDER SEAL

1 [REDACTED] Ex. 75 (*About ad auctions*, Meta Platforms, Inc.,
2 <https://www.facebook.com/business/help/430291176997542?id=561906377587030>) (“Each time
3 there’s an opportunity to show an ad to someone, an auction takes place to determine which ad to
4 show to that person.”). In view of the above, Dr. Williams concludes that social advertising prices
5 for Meta ads during the Class Period were higher for all or almost all members of the proposed Class
6 than the social advertising in a but-for world without Meta’s monopoly-maintaining anticompetitive
7 conduct. Williams Rpt., ¶354, Williams Reply, ¶96.

8 **C. Aggregate Damages Can Be Calculated on a Classwide Basis**

9 Having determined the extent of the overcharge, on a classwide percentage difference basis,
10 between Meta’s actual advertising revenues for the proposed Class and its but-for advertising
11 revenues, Dr. Williams multiplies this percentage overcharge by the relevant volume of commerce to
12 calculate aggregate damages on a classwide basis. Williams Rpt., ¶354. Specifically, using [REDACTED]

13 [REDACTED] as the volume of commerce for U.S. Meta advertising during the Class Period (as calculated
14 by Mr. Kreitzman), Dr. Williams uses the EPR damages methodology based on a yardstick model
15 that he previously determined resulted in a classwide overcharge of [REDACTED] (as a percentage of actual
16 values) to calculate classwide damages for the proposed Class, across the Class Period, of [REDACTED]

17 [REDACTED] *Id.*, ¶¶355-357. Like classwide injury, classwide damages can and will be calculated using
18 well-accepted economic methods, using common evidence. *Id.*; *see id.*, ¶¶324-354 (classwide
19 overcharge determination). And though not required at this stage, Dr. Williams also explains how
20 individual damages can be calculated using a common formulaic method – multiplying the dollar
21 value of a given Class member’s advertising purchases by the common classwide overcharge (as a
22 percentage of actual values). Williams Reply, ¶64.

23 **ARGUMENT**

24 A plaintiff seeking class certification “must satisfy the four requirements of Rule 23(a):
25 (1) numerosity; (2) commonality; (3) typicality; and (4) adequacy of representation.” *Senne v. Kan.*
26 *City Royals Baseball Corp.*, 934 F.3d 918, 927 (9th Cir. 2019). The plaintiff also “must show that
27 the class fits into one of three categories” set forth in Rule 23(b). *Olean Wholesale Grocery Coop.*,
28 *Inc. v. Bumble Bee Foods LLC*, 31 F.4th 651, 663 (9th Cir. 2022) (*en banc*). Here, Advertiser

FILED UNDER SEAL

1 Plaintiffs propose a class under Rule 23(b)(3), under which a class may be certified if two additional
2 requirements are met – predominance and superiority. *See Fed. R. Civ. P.* 23(b)(3) (requiring a
3 finding that “the questions of law or fact common to class members predominate over any questions
4 affecting only individual members, and that a class action is superior to other available methods for
5 fairly and efficiently adjudicating the controversy”). Advertiser Plaintiffs’ proposed Class meets
6 these requirements and should be certified.

7 **V. THE REQUIREMENTS OF RULE 23(A) ARE SATISFIED**

8 **A. Rule 23(a)(1)’s Numerosity Requirement Is Met**

9 There can be no dispute that the proposed Class is so numerous such that joinder of all
10 members would be “impracticable.”⁷ *Fed. R. Civ. P.* 23(a)(1). By July 2017, there were [REDACTED]
11 active U.S. advertisers across Meta platforms (Ex. 76), and in 2020 there were [REDACTED]

12 [REDACTED] Ex. 77 at 862. The proposed Class easily satisfies the
13 numerosity requirement. *See Johnson v. City of Grants Pass*, 72 F.4th 868, 886 (9th Cir. 2023)
14 (holding that “classes of more than sixty [members] are sufficiently large” to satisfy numerosity
15 requirement); *DZ Rsrv.*, 2022 WL 912890, at *3.

16 **B. Rule 23(a)(2)’s Commonality Requirement Is Met**

17 Rule 23(a) also requires one or more questions of law or fact common to the class. *Fed. R.*
18 *Civ. P.* 23(a)(2). Rule 23 does not require that all questions of law and fact be common to every class
19 member; rather, Advertiser Plaintiffs’ claims “must depend upon a common contention . . . of such a
20 nature that it is capable of classwide resolution – which means that determination of its truth or falsity
21 will resolve an issue that is central to the validity of each one of the claims in one stroke.” *Wal-Mart*
22 *Stores, Inc. v. Dukes*, 564 U.S. 338, 350 (2011).

23 “Antitrust liability alone constitutes a common question that ‘will resolve an issue that is
24 central to the validity’ of each class member’s claim ‘in one stroke.’” *In re High-Tech Emp. Antitrust*
25 *Litig.*, 985 F. Supp. 2d 1167, 1180 (N.D. Cal. 2013). Indeed, this case presents several common
26 questions of law and fact that satisfy Rule 23’s commonality requirement because they will “generate

27
28 ⁷ Numerosity remains even if the class is divided into pre- and post-May 25, 2018 classes, as
both classes would include millions of members.

FILED UNDER SEAL

1 common *answers* apt to drive the resolution of the litigation.” *Wal-Mart*, 564 U.S. at 350 (emphasis
2 in original). Further, each of these common questions is amenable to classwide resolution because
3 each “focuses on the actions of Defendant[] and does not vary by class member.” *Bias v. Wells Fargo*
4 & Co., 312 F.R.D. 528, 537 (N.D. Cal. 2015). These common questions include whether, during the
5 Class Period: (1) there existed a relevant antitrust market consisting of social advertising in the United
6 States; (2) Meta possessed monopoly power in that market; (3) Meta willfully maintained its
7 monopoly in or attempted to monopolize that market; (4) Meta entered into an agreement with Google
8 in unreasonable restraint of trade; and (5) all (or nearly all) members of the Class suffered damage as
9 a result of Meta’s anticompetitive conduct. Commonality is readily satisfied.

10 **C. Rule 23(a)(3)’s Typicality Requirement Is Met**

11 Rule 23’s typicality requirement is “a ‘permissive’ standard” that is satisfied when the “claims
12 or defenses of the representative parties are typical of the claims or defenses of the class.” *Bias*, 312
13 F.R.D. at 537. “This requirement is usually satisfied if the named plaintiffs have suffered the same
14 or similar injuries as the unnamed class members, the action is based on conduct which is not unique
15 to the named plaintiffs, and other class members were injured by the same course of conduct.” *In re*
16 *NCAA Student-Athlete Name & Likeness Licensing Litig.*, No. C 09-1967 CW, 2013 WL 5979327, at
17 *4 (N.D. Cal. Nov. 8, 2013). The representative claims need only be “reasonably coextensive with
18 those of absent class members; they need not be substantially identical.” *Ruiz Torres v. Mercer*
19 *Canyons Inc.*, 835 F.3d 1125, 1141 (9th Cir. 2016). Even when Class members “differ in advertising
20 budgets and scope of purchases,” these differences do not defeat typicality because the advertising
21 “products, pricing, and programs accessed by class members” are sufficiently similar across Meta’s
22 platforms. *DZ Rsrv.*, 2022 WL 912890, at *4; *see* Williams Reply, ¶¶48-60; *supra*, SOCF, §IV.B.

23 Nor does Meta’s May 2018 arbitration provision pose a challenge to typicality. Not only has
24 Meta waived any right to arbitrate the claims of absent Class members by “vigorously litigat[ing] this
25 lawsuit in federal court as if arbitration were not an option,” *DZ Rsrv.*, 2022 WL 912890 at *4; *see*
26 *also Hill*, 59 F.4th at 469-70 & n.15; *Roman*, 342 F.R.D. at 290-94, but even if arbitration were
27 relevant, it would not defeat typicality (or, for that matter, adequacy). The arbitration provision in
28 Meta’s Commercial Terms took effect May 25, 2018. Ex. 78. As in *DZ Reserve v. Meta Platforms*,

FILED UNDER SEAL

1 *Inc.*, Advertiser Plaintiffs “purchased ads both before and after May 2018,”⁸ making their claims
 2 typical of (and making them adequate representatives for) “advertisers who purchased ads before and
 3 after May [25], 2018.” 2022 WL 912890, at *4.

4 Advertiser Plaintiffs’ claims are the same as the proposed Class members’ and based on the
 5 same conduct by Meta, and damages can be shown by a common classwide methodology. *See supra*,
 6 SOCF §§III, IV. Accordingly, typicality is satisfied.

7 **D. Rule 23(a)(4) and 23(g) Adequacy Requirements Are Met**

8 Rule 23(a) requires representative plaintiffs to “fairly and adequately protect the interests of
 9 the class.” Fed. R. Civ. P. 23(a)(4). Likewise, Rule 23(g) requires class counsel to “fairly and
 10 adequately represent the interests of the class.” Fed. R. Civ. P. 23(g)(4). The related inquiries
 11 consider ““(1) [whether] the representative plaintiffs and their counsel have any conflicts of interest
 12 with other class members, and (2) [whether] the plaintiffs and their counsel prosecute the action
 13 vigorously on behalf of the class.”” *Kumar v. Salov N. Am. Corp.*, No. 14-cv-2411-YGR, 2016 WL
 14 3844334, at *2 (N.D. Cal. July 15, 2016) (quoting *Staton v. Boeing Co.*, 327 F.3d 938, 957 (9th Cir.
 15 2003)). Advertiser Plaintiffs and their counsel readily meet these requirements.

16 *First*, no conflicts exist between Advertiser Plaintiffs and their counsel and the Class as a
 17 whole: their interests are aligned in challenging Meta’s anticompetitive conduct. Advertiser Plaintiffs
 18 all state that they have “no conflicts of interest with any class member that would prevent [them] from
 19 fairly and adequately representing the best interests of the class.”⁹ And the relief Advertiser Plaintiffs
 20 and their counsel seek is the same for the named plaintiffs and the Class: recovery for inflated sums
 21 paid to Meta for social advertising.

22 *Second*, since March 18, 2021, when Advertiser Plaintiffs’ counsel were initially appointed as
 23 interim lead counsel (ECF No. 73), counsel have vigorously litigated the case on behalf of the
 24 proposed Class. Advertiser Plaintiffs’ counsel have engaged in 26 months of extensive discovery
 25 including: taking 49 depositions of Meta fact witnesses; issuing 30 third-party document subpoenas
 26 and participating in 29 third-party depositions; participating in countless meet-and-confers on

1 discovery issues, and bringing those issues to Court where required; and reviewing millions of
 2 documents produced by Meta and third parties. Advertiser Plaintiffs' counsel have engaged experts
 3 that, over the course of two years, have developed opinions on technical issues, market definition,
 4 monopoly power, antitrust impact, and damages.

5 Each Advertiser Plaintiff has actively participated in the case by reviewing filings, producing
 6 documents, answering interrogatories, and sitting for a deposition, and all state that they understand
 7 their duties as Class representatives and are willing to serve in that role.¹⁰ In sum, Advertiser Plaintiffs
 8 and their counsel have and will continue to adequately represent the proposed Class.

9 **VI. THE REQUIREMENTS OF RULE 23(b)(3) ARE SATISFIED**

10 **A. The Predominance Requirement Is Met**

11 The predominance requirement is also met here. “The predominance inquiry asks whether
 12 the common, aggregation-enabling, issues in the case are more prevalent or important than the non-
 13 common, aggregation-defeating, individual issues.” *Tyson Foods, Inc. v. Bouaphakeo*, 577 U.S. 442,
 14 453 (2016) (cleaned up). Plaintiffs need not “prove that each element of their claim is susceptible to
 15 classwide proof,” *Amgen Inc. v. Conn. Ret. Plans & Tr. Funds*, 568 U.S. 455, 469 (2013) (cleaned
 16 up), and “more important questions apt to drive the resolution of the litigation are given more weight
 17 in the predominance analysis over individualized questions which are of considerably less
 18 significance to the claims of the class.”” *In re Hyundai & Kia Fuel Econ. Litig.*, 926 F.3d 539, 557
 19 (9th Cir. 2019) (*en banc*). Thus, “even if just one common question predominates,” (*id.*), a class may
 20 be certified under Rule 23(b)(3) “even though other important matters will have to be tried
 21 separately, such as damages or some affirmative defenses peculiar to some individual class
 22 members.”” *Tyson Foods*, 577 U.S. at 453.¹¹

23 “Considering whether ‘questions of law or fact common to class members predominate’
 24 begins, of course, with the elements of the underlying cause of action.” *Erica P. John Fund, Inc. v.*
25 Halliburton Co., 563 U.S. 804, 809 (2011) (quoting Fed. R. Civ. P. 23(b)(3)). For private antitrust

26 ¹⁰ Berney Decl., ¶¶21-23; Frederick Decl., ¶¶16-18; Looper Decl., ¶¶41-43; Young Decl., ¶¶14-
 27 16.

28 ¹¹ The predominance requirement overlaps with Rule 23(a)’s commonality requirement, see *Olean*, 31 F.4th at 664, and they may be assessed “in tandem.” *In re Google Play Store Antitrust Litig.*, No. 21-md-02981-JD, 2022 WL 17252587, at *8 (N.D. Cal. Nov. 28, 2022) (Donato, J.).

FILED UNDER SEAL

1 actions like this one brought under 15 U.S.C. §15, the elements of a claim are “(i) the existence of an
2 antitrust violation; (ii) ‘antitrust injury’ or ‘impact’ flowing from that violation;” and “(iii) measurable
3 damages.” *Olean*, 31 F.4th at 665-66. Predominance thus requires that “‘essential elements of the
4 cause of action,’ such as the existence of an antitrust violation or antitrust impact, are capable of being
5 established through a common body of evidence, applicable to the whole class.” *Id.* at 666.

6 As in most antitrust class actions, the questions of whether Meta violated the antitrust laws
7 and whether each Class member suffered an impact (in the form of higher ad prices) flowing from
8 those violations will be answered at trial based on common, classwide evidence. *See Amchem*, 521
9 U.S. at 625 (“Predominance is a test readily met in certain cases alleging . . . violations of the antitrust
10 laws.”). Aggregate damages can also be calculated here on a classwide basis.

11 **1. Common Questions Predominate as to Meta’s Antitrust Violations**

12 Advertiser Plaintiffs allege that Meta has engaged in three types of antitrust violations under
13 the Sherman Act: (1) monopolization under Section 2, 15 U.S.C. §2; (2) attempted monopolization
14 under Section 2; and (3) restraint of trade under Section 1, 15 U.S.C. §1. These violations can and
15 will be established through common evidence, including with respect to market definition (*supra*,
16 SOCF §II), Meta’s anticompetitive acts (*id.*, §III), and antitrust impact (*id.*, §IV.A), as each of them
17 “turns on [Meta’s] conduct and intent along with the effect on the market, *not* on individual class
18 members.” *In re Glumetza Antitrust Litig.*, 336 F.R.D. 468, 475 (N.D. Cal. 2020). Moreover, this
19 common evidence will unquestionably drive the resolution of any trial in this matter.

20 A Section 2 monopolization claim has two elements: ““(1) the possession of monopoly power
21 in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished
22 from growth or development as a consequence of a superior product, business acumen, or historic
23 accident.”” *Epic Games, Inc. v. Apple, Inc.*, 67 F.4th 946, 998 (9th Cir. 2023). Attempted
24 monopolization requires: ““(1) specific intent to monopolize a relevant market; (2) predatory or
25 anticompetitive conduct; and (3) a dangerous probability of success.”” *Optronic Techs., Inc. v.*
26 *Ningbo Sunny Elec. Co.*, 20 F.4th 466, 481-82 (9th Cir. 2021). “[C]ourts have routinely certified
27 classes alleging that a monopolist’s conduct caused a direct and uniform overcharge, as overcharge
28 cases often rely on facts common across the class such as the existence of a relevant market, the

FILED UNDER SEAL

1 defendant's monopoly power, and the existence of the illegal course of conduct." 6 *Newberg and*
2 *Rubenstein on Class Actions* §20:28 (6th ed. 2022) (hereinafter *Newberg*) (collecting cases); *see also*
3 *Glumetza*, 336 F.R.D. at 475 ("Section 2 monopolization claims readily lend themselves to common
4 evidence."). Here, Advertiser Plaintiffs allege that Meta unlawfully maintained its monopoly,
5 resulting in a classwide overcharge in the form of higher ad prices.

6 Advertiser Plaintiffs' Section 1 claim similarly can be established through common evidence.
7 Section 1 requires a plaintiff to prove "(1) the existence of an agreement, and (2) that the agreement
8 was in unreasonable restraint of trade." *FTC v. Qualcomm Inc.*, 969 F.3d 974, 988-89 (9th Cir. 2020)
9 (cleaned up). The particular restraint of trade alleged here – a horizontal market-division agreement
10 between Meta and Google – is a *per se* violation of Section 1. *In re Musical Instruments & Equip.*
11 *Antitrust Litig.*, 798 F.3d 1186, 1191 (9th Cir. 2015) (citing *United States v. Topco Assocs., Inc.*, 405
12 U.S. 596, 608 (1972)). "Market-division cases . . . are generally well-suited for class action
13 adjudication," both because the violation is established *per se* and because (like monopolization
14 cases) "predominance concerns are eased by a focus on the defendants' conduct." 6 *Newberg* §20:24
15 (citing, *inter alia*, *Krehl v. Baskin-Robbins Ice Cream Co.*, 78 F.R.D. 108, 123 (C.D. Cal. 1978)).

16 Moreover, alleged antitrust violations here will be established through common evidence,
17 which will predominate at trial. *First*, the five categories of exclusionary conduct by Meta (one of
18 which, Meta's market division with Google, also underlies the Section 1 claim) will be established
19 entirely through common, classwide evidence – principally from Meta itself – and will be the
20 centerpiece of trial on Advertiser Plaintiffs' claims. *See supra*, SOCF §III; *see also* Gans Rpt., ¶¶49-
21 109 (Meta's exclusionary conduct susceptible to common, classwide proof). *Second*, for the Section
22 2 claims, the existence of the U.S. Social Advertising Market and Meta's power in that market will
23 be established by common evidence that will not vary from plaintiff to plaintiff. *See supra*, SOCF
24 §§II (market definition), IV.A (monopoly power); Williams Rpt. at 8-95 (market definition), 96-155
25 (monopoly power); *see, e.g.*, *In re Live Concert Antitrust Litig.*, 247 F.R.D. 98, 131 (C.D. Cal. 2007)
26 (market definition and monopoly power to be established through "the same data, the same experts,
27 the same industry analyses, and the same application of the same economic tests"). In sum, common
28 questions predominate as to the antitrust violation element of Advertiser Plaintiffs' claims. *See, e.g.*,

FILED UNDER SEAL

1 *Glumetza*, 336 F.R.D. at 475-76 (common questions predominated as to §2 and §1 violations); *Live*
2 *Concert*, 247 F.R.D. at 122-32 (same, for §2 monopolization and attempted monopolization).

3 **2. Common Questions Predominate as to Antitrust Impact and Damages**

4 Common questions also predominate as to antitrust impact and damages. To show antitrust
5 impact at the class-certification stage, plaintiffs “must establish, predominantly with generalized
6 evidence, that all (or nearly all) members of the class suffered damage as a result of [the defendant’s]
7 alleged anti-competitive conduct.” *In re Packaged Seafood Prods. Antitrust Litig.*, 332 F.R.D. 308,
8 320 (S.D. Cal. 2019), *aff’d sub nom. Olean*, 31 F.4th at 651. As discussed above, Advertiser
9 Plaintiffs’ expert, Dr. Williams, uses well-accepted economic methods and common evidence to show
10 that all (or nearly all) members of the proposed class paid inflated prices for Meta ads as a result of
11 Meta’s unlawful monopoly. *See, e.g., Olean*, 31 F.4th at 670 (affirming holding that plaintiffs’
12 evidence was capable of establishing antitrust impact, “in the form of higher prices paid by each
13 member of the class,” on a classwide basis). He does this by using the EPRs of comparable firms to
14 estimate Meta’s social advertising revenues in a but-for world in the absence of Meta’s
15 anticompetitive conduct, then comparing them with Meta’s actual supracOMPETITIVE social advertising
16 revenues during the Class Period. *See supra*, SOCF §IV.B. Having determined the extent of the
17 overcharge, on a classwide percentage difference basis, and multiplying that by the volume of
18 commerce for Meta advertising during the Class Period, Dr. Williams is also able to calculate
19 aggregate damages. *See supra*, SOCF §IV.C. This “yardstick” approach to isolate the “but-for” effect
20 of Meta’s anticompetitive conduct is a well-established method of proving classwide impact and
21 damages in antitrust cases. *See Olean Wholesale Grocery Coop., Inc. v. Bumble Bee Foods LLC*, 993
22 F.3d 774, 788-89 (9th Cir. 2021), vacated on other grounds, 31 F.4th 651 (9th Cir. 2022); *Tawfilis v.*
23 *Allergan, Inc.*, No. 8:15-cv-00307-JLS-JCG, 2017 WL 3084275, at *6 (C.D. Cal. June 26, 2017); *In*
24 *re Dynamic Random Access Memory (DRAM) Antitrust Litig.*, No. 02-1486-PJH, 2006 WL 1530166,
25 at *9-10 (N.D. Cal. June 5, 2006).

26 Providing a model for estimating aggregate damages is sufficient to establish predominance.
27 *See Ruiz Torres*, 835 F.3d at 1140 (“[T]here is no absolute requirement in Rule 23 that aggregate
28 damages be calculable, but where they are, they may be all that plaintiffs need to prove.”) (quoting

FILED UNDER SEAL

1 *Newberg* §12(2)); *see also In re Suboxone (Buprenorphine Hydrochlorine & Naloxone) Antitrust*
2 *Litig.*, 967 F.3d 264, 271 (3d Cir. 2020) (“Antitrust plaintiffs may satisfy the predominance
3 requirement by using a model that estimates the damages attributable to the antitrust injury, even if
4 more individualized determinations are needed later to allocate damages among class members.”).
5 But while “the need for individual damages calculations does not, alone, defeat class certification,”
6 *Vaquero v. Ashley Furniture Indus., Inc.*, 824 F.3d 1150, 1155 (9th Cir. 2016), Dr. Williams also
7 provides a method for calculating individual damages using a common formulaic method –
8 multiplying the dollar value of a given Class member’s advertising purchases by the percentage
9 overcharge. Williams Reply, ¶64; *see also, e.g.*, *Suboxone*, 967 F.3d at 272 n.13.

10 None of Meta’s apparent counterarguments (drawn from Meta’s disclosed expert reports)
11 change what information and evidence will predominate at trial regarding antitrust impact and
12 damages. Meta’s expert Dr. Tucker claims that “under Plaintiffs’ theories, each form of alleged
13 conduct offered distinct benefits to many advertisers, and these benefits varied across advertisers,”
14 apparently to set up an argument that individualized antitrust impact and damages issues might
15 predominate at trial. Tucker Rpt., ¶104. But Dr. Tucker’s opinions in this regard are deeply flawed
16 for numerous reasons, as both Dr. Williams and Prof. Gans show in their Reply Reports.

17 To start, as Dr. Williams explains, Dr. Tucker’s assertion that Meta’s alleged anticompetitive
18 conduct led to significant innovation and quality improvement for Meta contradicts both economic
19 theory and [REDACTED] Williams Reply, ¶67. It ignores that any innovation and product-quality
20 improvement from social data obtained from Meta’s alleged conduct is limited due to diminishing
21 returns to data size (*id.*, ¶¶68-71), and it also ignores that competition, rather than monopolization,
22 leads to more innovation and product improvement. *Id.*, ¶¶72-79. That is, with more competition in
23 a but-for world in the absence of the alleged conduct, there would be more – rather than less –
24 innovation and quality improvement. *Id.*; *see also* Gans Reply, ¶25 (“[L]ower prices are associated
25 with improved ad-targeting when there is sufficient competition for advertisers.”). Additionally, Dr.
26 Tucker’s claim about alleged innovation and product-quality improvements by Meta during the Class
27 Period is asserted without any evidence – [REDACTED]
28 [REDACTED] Williams Reply, ¶¶80-83 (showing

FILED UNDER SEAL

1 [REDACTED] Dr. Tucker’s claims regarding product
2 improvement are flawed not just for antitrust impact (*id.*, ¶¶66-83), but in regard to Plaintiffs’
3 damages model as well. *Id.*, ¶¶89-92.

4 Next, Dr. Tucker’s claims that Advertiser Plaintiffs failed to separate the effect in their
5 damages model of “each aspect of the alleged conduct” simply ignore Dr. Williams’ actual analysis,
6 which proposes using a well-established economic methodology to calculate damages “from [Meta’s]
7 monopoly maintenance – rather than any individual exclusionary act.” Williams Reply, ¶84 (quoting
8 Williams Rpt., ¶328); *see* Williams Reply, ¶¶84-88; *City of Anaheim v. S. Cal. Edison Co.*, 955 F.2d
9 1373, 1376 (9th Cir. 1992) (“[I]t would not be proper to focus on specific individual acts of an accused
10 monopolist while refusing to consider their overall combined effect.”); *Suboxone*, 967 F.3d at 270-
11 71 & n.11 (rejecting challenge to damages model examining combined effects of monopolistic acts
12 where there was “one theory of liability proven by a variety of acts resulting in one antitrust injury”).

13 Finally, Dr. Tucker makes a series of claims regarding Meta’s auction pricing, in connection
14 with both antitrust impact and classwide damages. None of these claims defeats predominance:

- 15 • Dr. Tucker argues that due to the nature of the ad auction, [REDACTED]
16 [REDACTED] (Tucker Rpt., ¶123), and that as a result, further inquiry would be
17 required to demonstrate common injury, including inquiry into [REDACTED]
18 [REDACTED] (*id.*, ¶122), [REDACTED]
19 [REDACTED] (*id.*, [REDACTED]) *Id.*, ¶125. Dr. Williams’ Reply Report
20 shows that each of these alleged issues is either irrelevant, *de minimis*, or simply factually
21 and economically wrong;
- 22 • Dr. Tucker’s claim that the [REDACTED] is inconsistent
23 with basic economics and with the actual facts (Williams Reply, ¶¶100-111), including
24 [REDACTED] *Id.*, ¶¶106-107;
- 25 • Dr. Tucker’s set of “further inquiries” that she asserts Advertiser Plaintiffs should have
26 performed are unnecessary based on [REDACTED] and basic economics
27 (*id.*, ¶¶112-114, 120, 122), and it is in any event infeasible, requiring data that Meta
28 refused to produce despite Advertiser Plaintiffs requesting it. *Id.*, ¶¶114-119, 121-122;

FILED UNDER SEAL

- 1 • Dr. Tucker's claim [REDACTED]
2 both basic monopoly economics and the actual analysis conducted by Advertiser
3 Plaintiffs' experts, who analyzed (and will analyze, at trial) antitrust impact and damages
4 from a market-wide price inflation due to monopoly maintenance – not some sort of
5 entrant-by-entrant or action-by-action method of proof. *Id.*, ¶¶123-125; and
6 • Dr. Tucker's claims about [REDACTED] (Tucker Rpt., ¶¶129-131), and about [REDACTED]
7 [REDACTED] (*id.*, ¶133), are also off
8 base. As Dr. Williams explains, increased competition is associated with [REDACTED]
9 [REDACTED] such that it makes no sense to argue that some proposed Class
10 members are uninjured as against the but-for world [REDACTED] during
11 the period of Meta's monopoly. Williams Reply, ¶¶126-127. Additionally, [REDACTED]
12 [REDACTED]
13 [REDACTED] *Id.*, ¶128.¹²

14 Again, none of the alleged individualized pricing issues posited by Dr. Tucker – even if they
15 could be shown to exist at all – defeats predominance given the common facts of this case. As the *en*
16 *banc* Ninth Circuit has explained, “[i]t is not implausible to conclude that a conspiracy could have a
17 class-wide impact, ‘even where the market involves diversity in products, marketing, and prices,’
18 especially ‘where . . . there is evidence that the conspiracy artificially inflated the baseline for price
19 negotiations.’” *Olean*, 31 F.4th at 677-78; *see also id.* at 678 (“it is both logical and plausible that
20 the conspiracy could have raised the baseline prices for all members of the class by roughly ten
21 percent”). “Courts have held that even if there is considerable individual variety in pricing because
22 of individual price negotiations, plaintiffs may succeed in proving class-wide impact by showing the
23 minimum baseline for beginning negotiations, or the range of prices which resulted from the
24 negotiation, was artificially raised by anti-competitive actions of the defendant.” *Giuliano v. Sandisk*

25 _____

27 [REDACTED] (Williams Reply, ¶¶130-133),
28 [REDACTED] (Tucker Rpt., ¶132),
[REDACTED] Williams Reply.

FILED UNDER SEAL

1 Corp., No. C 10-02787-SBA, 2015 WL 10890654, at *18 (N.D. Cal. May 14, 2015). This principle
2 applies not just to Plaintiffs’ antitrust impact analysis, but also to their classwide damages
3 methodology. *See Tawfils*, 2017 WL 3084275, at *14 (approving use of yardstick approach to model
4 classwide damages where “[a]pplication of the same percentage decrease to Botox list price in the
5 United States during the class period would have a common impact on all class members, regardless
6 of whether they received a rebate”); *see also In re Capacitors Antitrust Litig.* (No. III), No. 14-CV-
7 03264-JD, 2018 WL 5980139, at *9 (N.D. Cal. Nov. 14, 2018) (Donato, J.) (relevant product
8 “customization,” “different end uses and demands, and differences among class members with regard
9 to bargaining power and pricing . . . pose no barrier to certification because . . . these kinds of
10 individualized damages variations do not defeat predominance”).

11 **B. The Superiority Requirement Is Met**

12 Rule 23(b)(3) requires a finding that “a class action is superior to other available methods for
13 fairly and efficiently adjudicating the controversy.” Fed. R. Civ. P. 23(b)(3). “The purpose of the
14 superiority requirement is to assure that the class action is the most efficient and effective means of
15 resolving the controversy. Where recovery on an individual basis would be dwarfed by the cost of
16 litigating on an individual basis, this factor weighs in favor of class certification.” *Wolin v. Jaguar*
17 *Land Rover N. Am., LLC*, 617 F.3d 1168, 1175 (9th Cir. 2010) (cleaned up). This requirement is met
18 here, as the Class comprises millions of advertisers – many, like Advertiser Plaintiffs, individuals or
19 small businesses who made relatively small ad purchases. *See DZ Rsrv.*, 2022 WL 912890, at *9
20 (superiority requirement met where Meta advertisers paid relatively small price premium); *supra*,
21 SOCF §IV; Williams Rpt., ¶¶351-357. Indeed, “[n]o reasonable person is likely to pursue these
22 claims on his or her own, especially given the cost and other resources required to litigate against a
23 company like Meta.” *DZ Rsrv.*, 2022 WL 912890, at *9; *see also In re TFT-LCD*, 267 F.R.D. at 314-
24 15 (noting that, in antitrust cases, individual damages “are likely to be too small to justify litigation,
25 but a class action would offer those with small claims the opportunity for meaningful redress”).

26 **CONCLUSION**

27 For the foregoing reasons, the Court should grant Advertiser Plaintiffs’ motion and certify a
28 Class as set forth above.
